

The Life Science seminar series spring 2017

Please book these dates so that you do not miss out on these very interesting seminars

When: 12.15-13.00

Coffee, tea and sandwiches will be provided

- Jan 18 **Walid Tajeddinn Abderhim** (MMB Alumni) Karolinska Institute
P257 Alzheimer's disease research centre, Division of neurogeriatrics.
Title: ***Serotonin and Alzheimer's Disease: From a Molecular and Biomarkers Perspective.***
Host: Per-Erik Olsson
- Feb 1 **Scott Montgomery**, Clinical Epidemiology, USÖ
B311 Title: ***Early life and intergenerational risks for immune-mediated disease***
Host: Per-Erik Olsson
- Feb 15 **Carlos Villascusa**, Center for Molecular Medicine, KI
HSM Title: ***New approaches by using patient-derived stem cells to study psychiatric disorders***
Host: Ajay Pradhan
- March 1 **Nils Lycke**, Sahlgrenska Akademin, Göteborg.
HSB Title: ***T cell tolerance as a means to treat autoimmune diseases: the story of a fusion protein with multiple properties.***
Host: Åke Strid
- March 15 **Maja Rupnik**, Faculty of Medicine, University of Maribor, Slovenia
HSM Titel: ***Clostridium difficile infection – from molecular epidemiology to gut microbiota***
Host: Jana Jass
- March 29 **Constantin Urban**, Department of Clinical Microbiology, Immunology
HSM Laboratory for Molecular Infection Medicine Sweden (MIMS), Umeå
Centre for Microbial Research (UCMR)
Title: ***The essential role of neutrophils in fungal infection.***
Host: Jana Jass
- April 19
HSB
- May 3 **Estanislao Nistal Villán**, Facultad de Farmacia, Universidad CEU San
B311 Pablo, Madrid, Spain
Title: ***IFN- β induction, molecular insights and possible in vivo applications***

Host: Jana Jass

May 17
HSB

May 31
HSB
