

Identifying Synergies and Collaboration Opportunities

DIGITAL SOLUTIONS, NEW TECHNOLOGIES, ROBOTICS AND AI

Call for the “Match-Making” session n°3

June 25th, 2026 – 02:00 pm to 04:00 pm (CET time)

After the great success of our previous “match-making sessions” within the [NEOLAIa alliance’s Living Lab programme](#), we’re excited to announce that it’s finally time again! These appreciated sessions bring together people, ideas, and initiatives from across the alliance—and now we’re delighted to host the next one on 25 June. Don’t miss the chance to connect, collaborate, and spark new opportunities!

HOW DOES IT WORK? As a “speed dating” format, the session is organized around a series of short exchanges in small groups (3/4 people per group). Each participant will have the opportunity to meet several peers during the session and briefly present their project, idea or initiative (at any stage), with the support of a one-slide presentation.

Why participate? By taking part, you will:

- identify potential partners across universities and regions
- contribute to the development of collaborative Living Lab projects with real regional impact
- gain visibility for your ideas or projects
- expand your professional network within NEOLAIa

Main topic: digital solutions, new technologies, robotics and AI

Expected participants: Researchers, project managers, heads of Living Labs, project officers, etc, which:

- are working in main topic mentioned above (and all sub-topics related)
- Are open to develop partnerships/collaborations within NEOLAIa alliance [collaborations can be workshop, conferences, publications, initiation of a network, etc]
- plans a multi-stakeholder approach, and/or citizen engagement in the frame of this collaboration

Registration: Registration is mandatory. Please complete the form by **12th June 2026**

[Register here](#) → ["Match-Making Session" - Digital solutions, new technologies, robotics & AI - 25/06/2026 – Remplir le formulaire](#)

A list of participants, with a brief summary of their projects will be spread before the event in order to ensure meaningful exchanges and anticipate potential synergies (projects can be at every stage: early idea stage, under development, already running and looking for new partners or perspectives).

The main objective is to facilitate synergies between universities, regional stakeholders and citizens and to support the emergence of concrete, multi-stakeholder projects. These sessions provide a friendly
