Android
Quick reference guide for connecting to Örebro University’s Wi-Fi network
1. **CONNECT TO “ORU-PUBLIC” (VOLUNTARY*)**

Open settings on your device and tap ORU-public. Open your Internet browser and choose ”Accept and log in (for visitors)”. Doing this means you can access the internet but we recommend that you continue following these instructions in order to access eduroam.

2. **CREATE A WI-FI ACCOUNT**

To use Örebro University’s Wi-Fi network eduroam, you must first create an account at [oru.se/english/wireless](http://oru.se/english/wireless). Click eduroam. You can also change your Wi-Fi password there.

3. **TAP SETTINGS AND TAP CONNECTIONS**

Tap Apps and then Settings. Tap Wi-Fi settings.

* You can also share internet from your phone or use some other internet connection.
4. TAP EDUROAM AND USE THE FOLLOWING SETTINGS

Note: you must first create a Wi-Fi account in Step 2 to continue.

**EAP method:** TTLS  
**CA certificate:** Leave as “Unspecified” or “Don’t validate”  
**Identity:** Type your Wi-Fi username (username@oru.se) and your Wi-Fi password.

Advanced settings:  
**Phase 2 authentication:** PAP  
**Anonymous identity:** Type anonymous@oru.se

Leave other settings unchanged.

Tap Connect.

5. CONNECTED TO EDUROAM?

Tap Settings and then Wi-Fi to see if eduroam is connected
COMMON ISSUES AND HOW TO SOLVE THEM

IT TAKES TOO LONG TO CONNECT
It is possible you have a poor connection to the wireless network. Restart your device and try connecting again.

YOU ARE ASKED TO TYPE IN YOUR LOGIN INFORMATION AGAIN
If you are asked to log in again, then you probably typed in the wrong username and/or password. Please note: you must first create a Wi-Fi account in step 2. Confirm that your Wi-Fi account was created properly and correctly spelled. Log in again. If you’re unsure of your password you can change it. See step 2.
