General syllabus for third-cycle courses and study programmes in

MEDIA AND COMMUNICATION STUDIES

Medie- och kommunikationsvetenskap

This syllabus was approved on 3 May 2007 (reg. no. CF 62-245/2007)\(^1\), \(^2\). It was last approved on 24 April 2014 (reg. no. ORU 5.1-1311/2014).

By virtue of the Higher Education Ordinance, Chapter 6, Section 26 (1993:100), Örebro University prescribes the following.

1 Subject description

The research study programme in media and communication studies at Örebro University focuses on the conditions, modes, production and reception of mediated communication. In accordance with the department’s research profiles and research programme, special focus is geared towards international communication, media and politics, film, public relations, risk and crisis communication, media and migration, new information technology, reception studies, as well as discourse and conversation analysis. The programme in media and communication studies provides in-depth knowledge of theoretical and methodological traditions, current research fields, and scientific methods.

2 Outcomes

The intended learning outcomes for the award of the degree, the qualitative targets, are evident from annex 1 to this syllabus. The different components of the third-cycle study programme shall together equip the research student to meet all intended learning outcomes\(^3\). The intended learning outcomes are referred to in more detail in the degree requirements in sections 5 and 6.

---

\(1\) Faculty Board of Humanities and Social Sciences

\(2\) The English translation of this general syllabus was last amended on 10 June 2014.

\(3\) Under the new higher education system in Sweden, and in accordance with the terminology recommended by the Swedish Council for Higher Education, courses and study programmes on the research/doctoral level are referred to as *third-cycle courses and study programmes*. In this document, the terms *research* and *third-cycle* are used interchangeably as prefixes to terms related to studies on the research/doctoral level and they should therefore be considered synonymous [translator’s comment].
3 Admission to the programme – entry requirements and selection etc.

Provisions on entry requirements and selection can be found in annex 2 to this syllabus. For information on admission in other respects, see the admission regulations for Örebro University.

4 Programme organisation – general information

There are two types of third-cycle, or research, study programmes – one concluding with the doctoral degree (240 credits, corresponding to four years of full-time study) and one concluding with the licentiate degree (120 credits, corresponding to two years of full-time study).

The programmes mainly consist of courses and the writing of a doctoral or licentiate thesis. The programme components are assessed by means of course examination and the public defence of the thesis respectively. The research student is expected to take an active part in seminars and other auxiliary components during his/her period of study. The student is further recommended to take advantage of the opportunities offered to attend guest lectures etc. at the university, and to attend and contribute to national and international conferences.

For each research student, a minimum of two supervisors will be appointed, supporting the student during his/her studies. One of them will be nominated principal supervisor. The detailed organisation of the programme shall be determined in an individual study plan.

5 Degree requirements for the Degree of Doctor, 240 credits

For the Degree of Doctor, the research student must
- have received a passing grade in the examinations of the 75 credits generated by the courses listed below,
- have received a passing grade on a scholarly dissertation (doctoral thesis) corresponding to 165 credits. The thesis is to be defended orally at a public defence event.

---

*4 Higher Education Ordinance, Chapter 6, Sections 4, 5, 28 and 29 and local guidelines on the organisation of third-cycle courses and study programmes
5 The Higher Education Ordinance stipulation that at least two supervisors be appointed for each research student does not apply to research students who commenced their studies before 1 July 2007. Instead, the older provision of at least one supervisor applies (point 18, transitional provisions of SFS 2006:1053).
6 Higher Education Ordinance, Chapter 6, Section 32
7 Higher Education Ordinance, Chapter 6, Sections 5 and 33*
Compulsory courses, total of 37.5 credits

Classics of Media Research, 7.5 credits
The course and examination shall refer to outcomes D1 (first part) and D10, annex 1

Qualitative Method, 7.5 credits
The course and examination shall refer to outcomes D2, D3, D9 and D10 (first part), annex 1

Current Film/Media Theory and Research, 15 credits
The course and examination shall refer to outcomes D1, D3 (the part that bears upon the capacity for scholarly analysis and synthesis), D4 (the part that bears upon the ability to critically, and autonomously, identify and formulate issues with scholarly precision), D7, D9 (the part that bears upon the ability to demonstrate intellectual autonomy), and D10 (the part that bears upon the ability to demonstrate specialised insight into the possibilities and limitations of research), annex 1

Philosophy of Science, 7.5 credits
The course and examination shall refer to outcomes D3 and D10, annex 1

Elective courses, total of 37.5 credits
Which course/courses a research student shall take is determined based on an assessment of what courses will enable him/her to meet the intended learning outcomes. The research student plans, in consultation with the supervisor, which courses should be part of his/her programme. The selection is then laid down in the individual study plan.

Block I: Complementary and specialised courses on theory and research, 15-22.5 credits
The courses and examinations included in this block shall refer to outcomes D1, D7 and D10, annex 1.

Block II: Complementary and specialised method courses, 15-22.5 credits
The courses and examinations included in this block shall refer to outcomes D2 and D4 (first part), annex 1

Block III: Conducting research and teaching, 0-7.5 credits
Where appropriate, the courses and examinations included in this block shall refer to outcomes D8, D9 and D10, annex 1.

Doctoral thesis and public defence, 165 credits
At the public defence event, the assessment of the doctoral thesis and the public defence thereof shall refer to all intended learning outcomes specified for the award of the doctoral degree, annex 1.

8 Previously named Literature course
6 Degree requirements for the Degree of Licentiate, 120 credits

The licentiate degree is the degree awarded to those who have been admitted to and successfully completed a licentiate programme. Students who have been admitted to the programme concluding with the doctoral degree have the right to apply for the award of a licentiate degree, as a half-way degree. The degree requirements in this section apply to the licentiate degree both as a final and as a half-way degree.

For the licentiate degree, the research student must
- have received a passing grade in the examinations of the 60 credits generated by the courses listed below,
- have received a passing grade on a scholarly paper (licentiate thesis) corresponding to 60 credits.

For courses and course blocks that are identical for the licentiate and doctoral degrees, please see outcomes and descriptions in section 5.

Compulsory courses, total of 37.5 credits

The compulsory courses are the same as for the doctoral degree (section 5).

Elective courses, total of 22.5 credits

Which course/courses a research student shall take is determined based on an assessment of what courses will enable him/her to meet the intended learning outcomes. The research student plans, in consultation with the supervisor, which courses should be part of his/her programme. The selection is then laid down in the individual study plan.

Block I: Complementary and specialised courses on theory and research, 7.5-15 credits

Block II: Complementary and specialised method courses, 7.5-15 credits

Licentiate thesis, 60 credits

On the examination of the licentiate thesis, the assessment shall refer to all intended learning outcomes specified for the award of the licentiate degree, annex 1.

7 Further information

Further information about provisions for research study programmes can be found on the university website. Documents there include the admissions regulations for Örebro University and other information on national and local regulations.
Entry-into-force and transitional provisions

This general syllabus shall be in effect from 1 July 2007.

Research students who have commenced their studies before 1 July 2007

Research students who have commenced their studies on the programme before 1 July 2007 shall continue their studies according to the new provisions for third-cycle courses and study programmes. As a principal rule, the research students will be awarded their qualification from the new programme.13

These research students have however the right, should they require, to complete their studies and obtain their qualification pursuant to the earlier provisions for third-cycle courses and study programmes. This right exists until, but no later than, the end of June 2015 (point 5, transitional provisions of SFS 2006:1053).

Amendments approved on 22 February 2010 shall take effect on that same day. These amendments refer to 1) the deletion of section 7.2, second paragraph and as a result, courses for research students on teaching and learning in higher education may from then on count towards their degree, and 2) the cancellation of the democracy specialisation.

Research students admitted before 1 January 2010 shall continue their studies according to the old provisions. Also these research students have however the right to, within the scope of the elective courses, include credits from initial training in teaching and learning in higher education in accordance with the above.

Amendments approved by the vice-chancellor on 19 October 2010 shall take effect on 1 January 2011. These amendments are brought about by changes in the Higher Education Ordinance, but do not lead to any substantive changes in the general syllabus.

Amendments of the general syllabus approved on 24 April 2014 shall take effect on 1 June 2014. These amendments refer to an adaptation of the general syllabus to the new template, through which, among other things, the different components of the programme are more clearly linked to the different intended learning outcomes (primarily sections 5 and 6). In addition, the number of credits of the course Qualitative Method (compulsory) has been adjusted, and as a consequence also the number of credits assigned to the compulsory and elective course blocks respectively for both the doctoral and licentiate degree. The course Literature Course has been renamed Current Film/Media Theory and Research. Furthermore, the assessment of applicants to the third-cycle programme shall be based on a project description, see section 3 B in annex 2.

Research students admitted before 1 May 2014 shall complete their studies in accordance with the previous degree requirements. If requested by a research student and it is deemed appropriate, provisions may be made in the individual study plan for the student to complete his/her studies in accordance with the new degree requirements.

---

13 Point 1, transitional provisions for SFS 2006:1053
### Outcomes for the DEGREE OF DOCTOR

For the Degree of Doctor, the third-cycle student shall demonstrate broad knowledge and systematic understanding of the research field as well as advanced and up-to-date specialised knowledge in a limited area of this field, and demonstrate familiarity with research methodology in general and the methods of the specific field of research in particular.

### Outcomes for the DEGREE OF LICENTIATE

For a Degree of Licentiate, the third-cycle student shall demonstrate knowledge and understanding in the field of research including current specialist knowledge in a limited area of this field as well as specialised knowledge of research methodology in general and the methods of the specific field of research in particular. (for the equivalent to D2, see L1, second part)

14 Extract from the Qualifications ordinance, annex 2, Higher Education Ordinance (1993:100)
Admission to research studies – entry requirements

1 Admission requirements – Higher Education Ordinance

The Higher Education Ordinance stipulates that the number of research students that may be admitted by the university may not exceed the number that can be offered supervision and otherwise acceptable conditions for study and whose studies are funded pursuant to the provisions in the Higher Education Ordinance 15.

The requirements for admission to third-cycle courses and study programmes are that the applicant
1. meets the general and specific entry requirements that the university may have laid down, and
2. is considered in other respects to have the ability required to benefit from the course or study programme 16.

2 Entry requirements

2.1 General entry requirements

A person meets the general entry requirements for third-cycle courses and study programmes if he or she
1. has been awarded a second-cycle qualification,
2. has satisfied the requirements for courses comprising at least 240 credits of which at least 60 credits were awarded in the second-cycle, or
3. has acquired substantially equivalent knowledge in some other way in Sweden or abroad.

The higher education institution may permit an exemption from the general entry requirements for an individual applicant, if there are special grounds 17.

Transitional provisions
a) A person with credits or qualifications from undergraduate programmes under the previous higher education system corresponding to the entry requirements above will also be eligible 18. Exemptions from the entry requirements may be made also in these cases, if there are special grounds.

b) A person who meets the general entry requirements for research study programmes (120 credits from undergraduate programmes or corresponding knowledge 19), before 1 July 2007 will also be considered to meet the general entry requirements for third-cycle courses and study programmes after that, however, until no later than the end of June 2015 20. Exemptions from this provision are not permitted.

---

15  Higher Education Ordinance, Chapter 7, Section 34
16  Higher Education Ordinance, Chapter 7, Section 35
17  Higher Education Ordinance, Chapter 7, Section 39
18  Point 10, transitional provisions for SFS 2006:1053
19  A person who has completed an undergraduate programme of at least 120 credits, or in some other way, in Sweden or abroad, has acquired substantially corresponding knowledge
20  Point 11, transitional provisions for SFS 2006:1053
2.2 Specific entry requirements

A person meets the specific entry requirements for third-cycle courses and study programmes in the subject if he or she has received a passing grade in courses of at least 120 credits, including an independent project on both the advanced course level and on the second cycle, in media and communication studies or in an equivalent main field of study. A person who has acquired substantially corresponding knowledge, in Sweden or abroad, also meets the specific entry requirements.

Transitional provisions

A person with credits or qualifications from undergraduate programmes under the previous higher education system corresponding to the entry requirements in the previous paragraph will also be eligible.21

This primarily refers to passed courses of at least 80 credits under the previous credit system, including an independent project on both the previous advanced course level/60 credit level and the previous higher advanced course level/80 credit level, in media and communication studies.

2.3 Ability in other respects to benefit from the course or study programme

The assessment whether the applicant has such ability in other respects to benefit from the programme shall be made based on prior courses and programmes taken by the applicant, on other previous activities, as well as on the essays and other independent projects of a scholarly nature that have been submitted by the applicant (compare assessment criteria in accordance with the university’s regulations on the selection of research students below).

3 Selection from among the applicants

In selecting between applicants, their ability to benefit from the programme shall be taken into account. The higher education institution determines which assessment criteria shall be used in determining the ability to benefit from the programme.

However, the fact that an applicant is considered able to transfer credits from prior courses and study programmes or for professional or vocational experience may not alone give the applicant priority over other applicants.22

Assessment criteria for selection23

The criteria A - B aim at facilitating an examination of the applicant’s ability to benefit from the programme. They should therefore be relevant to the applicant’s ability to later achieve the learning outcomes of the programme. The outcomes are described in annex 1 to this general syllabus.

---

21 Point 10, transitional provisions for SFS 2006:1053
22 Higher Education Ordinance, Chapter 7, Section 41
23 Local regulations on the selection of research students to third-cycle courses and study programmes etc.
A Courses, study programmes and other previous activities – formal qualifications
The assessment is based on submitted certificates and transcripts as well as on degree
certificates and/or course certificates.

Completed courses and study programmes and experience contributing to the
applicant’s ability to successfully benefit from the programme applied for are
considered an additional qualification.

- Courses and study programmes
Special emphasis is given to the scope, depth and grades of the applicant’s prior
courses and study programmes within the subject area applied for, particularly the
grades on written independent projects.

Emphasis is also given to the scope, depth and grades of prior courses and study
programmes within other fields of great relevance to the subject area applied for.

- Other previous activities
Special emphasis is given to long and independent professional and/or vocational
experience of great relevance to the subject area applied for.

B Capability – demonstrated knowledge, competence and skills
The assessment is based on a consideration of the applicant’s submitted essays and
other written independent projects of a scholarly nature and a project description.24
For those applicants who at this stage are considered to be most qualified, and if it is
deemed necessary, references will be taken and interviews will be carried out.

It is considered an additional qualification if the applicant demonstrates such
knowledge, competence and skills that contribute to his/her being successfully able to
benefit from the programme applied for. These are for example
- sound theoretical, analytic and methodological knowledge;
- sound ability to discuss, in writing and in speech, issues and conclusions;
- intellectual independence; and
- sound ability to carry out advanced tasks within given time frames.

Special emphasis is given to the applicant’s ability to
- identify and formulate realistic and productive research problems;
- integrate knowledge and experience and apply these in ways and in contexts where
they have not previously been used; and
- conduct a dialogue characterised by independence as well as by an ability to
cooperate.

C Weighing up qualifications
The fact that an applicant is considered able to transfer credits from prior courses and
study programmes or for professional or vocational experience may not alone give the
applicant priority over other applicants (Higher Education Ordinance, Chapter 7,
Section 41).

When weighing up the assessment criteria A and B, the greatest emphasis is placed on
criteria B, Capability.

24 The project description (5-10 pages) must include information about the topic and aim, research
questions and outline, scientific relevance, theory and method as well as material.
D Gender equality

If, followed from the above, applicants are found to have equal qualifications, preference will be given to applicants of the sex that is underrepresented among the research students within the subject area\textsuperscript{25}. The underrepresented sex here refers to if and when the share of either female or male students enrolled on the subject area’s third-cycle study programme amounts to less than 40 per cent.

\textsuperscript{25} Higher Education Act (SFS 1992:1434), Chapter 1, Section 5, second paragraph and other provisions
