General syllabus for third-cycle courses and study programmes in

EDUCATION

Pedagogik

This syllabus was approved on 14 June 2007 (reg. no. CF 62-250-2007). It was last amended on 9 March 2016 (reg. no. ORU 5.1-01212/2016).

By virtue of the Higher Education Ordinance, Chapter 6, Section 26 (1993:100), Örebro University prescribes the following.

1 Subject description

Education is a broad social science subject that has its focus on processes of Bildung, communication, learning and socialisation. The prerequisites for and the content of such processes are studied, as are the way they are shaped and their consequences. At Örebro University, studies of learning and socialisation are directed specifically towards how people create meaning based on individual, interactional and social perspectives. Democracy and human rights, didactics, curriculum theory, educational policy and educational philosophy all have a strong presence within education research at Örebro University. Questions of the way in which socialisation content is communicated, developed and transformed are also prominent, with a focus on communicative processes in institutional contexts, using pluralism and diversity as the starting point.

The department also offers a doctoral programme with a specialisation in:
- didactics, via the research school UVD (Educational Sciences with Emphasis on Didactics).
- technology-mediated knowledge processes, via the research school TKP (Technology-Mediated Knowledge Processes).

2 Outcomes

The intended learning outcomes for the award of the degree, the qualitative targets, are evident from annex 1 to this syllabus. The different components of the third-cycle study programme shall together equip the doctoral student to meet all intended learning outcomes. The intended learning outcomes are referred to in more detail in the degree requirements in sections 5 and 6.

---

1 The English translation of this general syllabus was last amended on 24 September 2018.
2 Under the new higher education system in Sweden, and in accordance with the terminology recommended by the Swedish Council for Higher Education, courses and study programmes on the
3 Admission to the programme – entry requirements and selection etc.

Provisions on entry requirements and selection can be found in annex 2 to this syllabus. For information on admission in other respects, see the admissions regulations for Örebro University.

4 Programme organisation – general information

There are two types of third-cycle, or doctoral, study programmes – one concluding with the doctoral degree (240 credits, corresponding to four years of full-time study) and one concluding with the licentiate degree (120 credits, corresponding to two years of full-time study).

The programmes mainly consist of courses and the writing of a doctoral or licentiate thesis. The programme components are assessed by means of course examination and the public defence of the thesis respectively. The doctoral student is expected to take an active part in seminars and other auxiliary components during their period of study. The student is further recommended to take advantage of the opportunities offered to attend guest lectures etc. at the university, and to attend and contribute at national and international conferences.

For each doctoral student, a minimum of two supervisors will be appointed, supporting the student during their studies. One of them will be nominated principal supervisor. The detailed organisation of the programme shall be determined in an individual study plan.

doctoral level are referred to as third-cycle courses and study programmes. In this document, the terms doctoral and third-cycle are used interchangeably as prefixes to terms related to studies at the doctoral level and they should therefore be considered synonymous [translator’s comment].

3 Higher Education Ordinance, Chapter 6, Sections 4, 5, 28 and 29 and local guidelines on the organisation of third-cycle courses and study programmes

4 The Higher Education Ordinance stipulation that at least two supervisors be appointed for each doctoral student does not apply to doctoral students who commenced their studies before 1 July 2007. Instead, the older provision of at least one supervisor applies (point 18, transitional provisions of SFS 2006:1053).
Degree requirements for the Degree of Doctor, 240 credits

For the Degree of Doctor, the doctoral student must
- have received a passing grade in the examinations of the 90 credits generated by the courses listed below,
- have received a passing grade on a scholarly dissertation (doctoral thesis) corresponding to 150 credits. The thesis is to be defended orally at a public defence event.

Compulsory courses, total of 20 credits

Education as Science – introductory course to educational research and its profiles, 15 credits
The course and examination shall refer to outcomes D1, D9 and D10, annex 1.

Research Dialogue and Research Presentation, 5 credits
The course and examination shall refer to outcomes D6 and D8, annex 1.

Elective courses, total of 70 credits
Which course/courses a doctoral student shall take is determined based on an assessment of what courses will enable them to meet the intended learning outcomes. The doctoral student plans, in consultation with the supervisor, which courses should be part of their programme. The selection is then laid down in the individual study plan.

Block I: Communication, learning and socialisation, 15–55 credits
The courses and examinations shall refer to outcomes D1, D3 and D4, annex 1. Courses selected in this block shall be within the field of Bildung, communication, learning, teaching and socialisation.
Examples of courses:
Läroplansteori och utbildningspolitik (Curriculum theory and educational policy), 7.5 credits
Lärande och kommunikation i ett sociokulturellt perspektiv (Learning and communication in a socio-cultural perspective), 7.5 credits
Didaktik som forskningsfält (Didactics as a field of research), 10 credits
Dissertation Defence Course, 7.5 credits

Block II: Philosophy of science and methodology, 15–55 credits
The courses and examinations shall refer to outcomes D2 and D3, annex 1. Courses selected in this block shall be within the field of theory of science, philosophy of science, methodology and research methods.
Examples of courses:
Qualitative Method, 7.5 credits
Quantitative Research Methods, 7.5 credits
Philosophy of Science, 7.5 credits
Didactic Methods, 10 credits

Block III: Special courses, 0–40 credits
The courses and examinations included in this block shall refer to one or more of the outcomes D1, D3, D4, D7 and D8, annex 1. Courses selected in this block shall be focusing on the selected thesis project and the specific knowledge needs of the individual doctoral student.

---

5 Higher Education Ordinance, Chapter 6, Section 32
6 Higher Education Ordinance, Chapter 6, Sections 5 and 33
Examples of courses:
Research ethics and good research practice, 3 credits
*Informationssökning* (Information retrieval), 3.5 credits
Individual literature course, total maximum of 15 credits

**Doctoral thesis and public defence, 150 credits**
At the public defence event, the assessment of the doctoral thesis and the public defence thereof shall refer to all intended learning outcomes specified for the award of the doctoral degree, annex 1.

**Specialisation in didactics – Degree of Doctor**
For students linked to the research school in didactics UVD, specific degree requirements apply:

**Compulsory courses within the research school UVD, total of 25 credits**
*Didaktik* (Didactics), 10 credits
The course and examination shall refer to outcomes D1, D4 and D7, annex 1.

Didactic Methods, 10 credits
The course and examination shall refer to outcomes D2, D3 and D9, annex 1.

Didactic seminars, 5 credits
The course and examination shall refer to outcome D6, annex 1.

**Compulsory course within the subject, 15 credits**
Education as Science – introductory course to educational research and its profiles, 15 credits
The course and examination shall refer to outcomes D1, D9 and D10, annex 1.

**Elective courses, total of 50 credits**
Block I: *Communication, learning and socialisation*, 5–45 credits
Block II: *Philosophy of science and methodology*, 5–45 credits
Block III: *Special courses*, 0–40 credits
For outcomes and examples of courses *etc*. see above under degree requirements for the doctoral degree in the subject in general.

**Doctoral thesis and public defence, 150 credits**
At the public defence event, the assessment of the doctoral thesis and the public defence thereof shall refer to all intended learning outcomes specified for the award of the doctoral degree, annex 1.

**Specialisation in technology-mediated knowledge processes – Degree of Doctor**
For students linked to the research school TKP, specific degree requirements apply:

**Compulsory courses within the research school TKP, total of 30 credits**
*IKT, informationssystem och kunskapsprocesser* (ICT, information systems and knowledge processes), 7.5 credits
Digital Tools and Knowledge Processes, 7.5 credits

---

7 The courses within the research school TKP have not been linked to any outcomes in connection with the amendment of 24 April 2014 since they have already been completed.
Computer Mediated Communication and Social Media, 7.5 credits
*Lärande och artefakter* (Learning and artefacts), 7.5 credits

Compulsory course within the subject, 15 credits
Education as Science – introductory course to educational research and its profiles, 15 credits
The course and examination shall refer to outcomes D1, D9 and D10, annex 1.

Elective courses, total of 45 credits
Block I: *Communication, learning and socialisation*, 0-30 credits
Block II: *Philosophy of science and methodology*, 15-45 credits
Block III: *Special courses*, 0-30 credits
For outcomes and examples of courses etc. see above under degree requirements for the doctoral degree in the subject in general.

Doctoral thesis and public defence, 150 credits
At the public defence event, the assessment of the doctoral thesis and the public defence thereof shall refer to all intended learning outcomes specified for the award of the doctoral degree, annex 1.

6 Degree requirements for the Degree of Licentiate, 120 credits

The licentiate degree is the degree awarded to those who have been admitted to and successfully completed a licentiate programme. Students who have been admitted to the programme concluding with the doctoral degree have the right to apply for the award of a licentiate degree, as a half-way degree. The degree requirements in this section apply to the licentiate degree both as a final and as a half-way degree.

For the licentiate degree, the doctoral student must
- have received a passing grade in the examinations of the 45 credits generated by the courses listed below,
- have received a passing grade on a scholarly paper (licentiate thesis) corresponding to 75 credits.

For courses and course blocks that are identical for the licentiate and doctoral degrees, please see outcomes and descriptions in section 5.

Compulsory courses, total of 20 credits
Education as Science – introductory course to educational research and its profiles, 15 credits
Research Dialogue and Research Presentation, 5 credits

---

8 Örebro University’s local regulations on qualifications
9 Higher Education Ordinance, Chapter 6, Section 32
10 Higher Education Ordinance, Chapter 6, Section 5
11 Since the licentiate degree may constitute a half-way degree on the road to a doctoral degree, the courses intended for a licentiate degree should, in conformity with the courses intended for a doctoral degree, be linked to the outcomes for the doctoral degree, see further in the guidelines for general syllabuses for third-cycle courses and study programmes.
Elective courses, total of 25 credits
Which course/courses a doctoral student shall take is determined based on an assessment of what courses will enable them to meet the intended learning outcomes. The doctoral student plans, in consultation with the supervisor, which courses should be part of their programme. The selection is then laid down in the individual study plan.

Block I: Communication, learning and socialisation, 7.5–17.5 credits
Block II: Philosophy of science and methodology, 7.5–17.5 credits
Block III: Special courses, 0–10 credits

Licentiate thesis, 75 credits
On the examination of the licentiate thesis, the assessment shall refer to all intended learning outcomes specified for the award of the licentiate degree, annex 1.

Specialisation in didactics – Degree of Licentiate
For students with a specialisation in didactics, specific degree requirements apply:

Compulsory courses within the research school UVD, 25 credits
*Didaktik som forskningsfält* (Didactics as a field of research), 10 credits
Didactic methods, 10 credits
Didactic seminars, 5 credits

Compulsory courses within the subject, 15 credits
Education as Science – introductory course to educational research and its profiles, 15 credits

Elective courses, 5 credits
Block I: Communication, learning and socialisation, 0–5 credits
Block II: Philosophy of science and methodology, 0–5 credits

Licentiate thesis, 75 credits
On the examination of the licentiate thesis, the assessment shall refer to all intended learning outcomes specified for the award of the licentiate degree, annex 1.

Specialisation in technology-mediated knowledge processes – Degree of Licentiate
For students with a specialisation in technology-mediated knowledge processes, specific degree requirements apply:

Compulsory courses within the research school TKP, total of 30 credits
*IKT, informationssystem och kunskapsprocesser* (ICT, information systems and knowledge processes), 7.5 credits
Digital Tools and Knowledge Processes, 7.5 credits
Computer Mediated Communication and Social Media, 7.5 credits
*Lärande och artefakter* (Learning and artefacts), 7.5 credits

Compulsory courses within the subject, 15 credits
Education as Science – introductory course to educational research and its profiles, 15 credits
7 Further information

Further information about provisions for doctoral study programmes can be found on the University website. Documents there include the admissions regulations for Örebro University and other information on national and local regulations.

Entry-into-force and transitional provisions

This general syllabus shall be in effect from 1 July 2007.

Doctoral students who have commenced their studies before 1 July 2007

Doctoral students who have commenced their studies on the programme before 1 July 2007 shall continue their studies according to the new provisions for third-cycle courses and study programmes. As a principal rule, the doctoral students will be awarded their qualification from the new programme. These doctoral students have however the right, should they require, to complete their studies and obtain their qualification pursuant to the earlier provisions for third-cycle courses and study programmes. This right exists until, but no later than, the end of June 2015 (point 5, transitional provisions of SFS 2006:1053).

Amendments to the general syllabus approved by the Vice-Chancellor on 19 October 2010 shall take effect on 1 January 2011. These are a result of amendments to the Higher Education Ordinance, but do not lead to any factual alterations in the general syllabus.

Amendments to the general syllabus approved on 21 December 2011 shall take effect on 1 January 2012. They refer, with the exception of a primarily editorial revision of the subject description, to the addition of two new specialisations on account of the new research schools LIMCUL and ITK and the degree requirements for these.

Amendments to the general syllabus approved on 24 April 2014 shall take effect on 1 July 2014. These amendments refer to an adaptation of the general syllabus to the new template, through which, among other things, the different components of the programme are more clearly linked to the different intended learning outcomes (primarily sections 5 and 6). In connection with this, changes have also been made

---

12 Point 1, transitional provisions for SFS 2006:1053
to the subject description (section 1) and the course requirements have been reduced (sections 5 and 6).

Doctoral students admitted before 1 January 2012 shall complete their studies in accordance with the previous degree requirements. If requested by a doctoral student and it is deemed appropriate, provisions may be made in the individual study plan for the student to complete their studies in accordance with the new degree requirements.

- - -

Amendments to the general syllabus approved on 9 March 2016 shall take effect on 9 March 2016. The amendment refers to the addition of the intended learning outcome D8 for the elective courses in block III (sections 5 and 6), and do not involve any changes to the degree requirements of either the doctoral or the licentiate degree.

13 Extract from the Qualifications ordinance, annex 2, Higher Education Ordinance (1993:100)
Admission to research studies – entry requirements

1 Admission requirements – Higher Education Ordinance

The Higher Education Ordinance stipulates that the number of doctoral students that may be admitted by the university may not exceed the number that can be offered supervision and otherwise acceptable conditions for study and whose studies are funded pursuant to the provisions in the Higher Education Ordinance.

The requirements for admission to third-cycle courses and study programmes are that the applicant
1. meets the general and specific entry requirements that the university may have laid down, and
2. is considered in other respects to have the ability required to benefit from the course or study programme.

2 Entry requirements

2.1 General entry requirements

A person meets the general entry requirements for third-cycle courses and study programmes if he or she
1. has been awarded a second-cycle qualification,
2. has satisfied the requirements for courses comprising at least 240 credits of which at least 60 credits were awarded in the second-cycle, or
3. has acquired substantially equivalent knowledge in some other way in Sweden or abroad.

The higher education institution may permit an exemption from the general entry requirements for an individual applicant, if there are special grounds.

Transitional provisions
a) A person with credits or qualifications from undergraduate programmes under the previous higher education system corresponding to the entry requirements above will also be eligible. Exemptions from the entry requirements may be made also in these cases, if there are special grounds.

b) A person who meets the general entry requirements for research study programmes (120 credits from undergraduate programmes or corresponding knowledge), before 1 July 2007 will also be considered to meet the general entry requirements for third-cycle courses and study programmes after that, however, until no later than the end of June 2015. Exemptions from this provision are not permitted.

---

14 Higher Education Ordinance, Chapter 7, Section 34
15 Higher Education Ordinance, Chapter 7, Section 35
16 Higher Education Ordinance, Chapter 7, Section 39
17 Point 10, transitional provisions for SFS 2006:1053
18 A person who has completed an undergraduate programme of at least 120 credits, or in some other way, in Sweden or abroad, has acquired substantially corresponding knowledge
19 Point 11, transitional provisions for SFS 2006:1053
2.2 Specific entry requirements

A person meets the specific entry requirements for third-cycle courses and study programmes in the subject if he or she has received a passing grade on courses of at least 90 credits, including an independent project at the advanced course level\textsuperscript{20} in education. A person who has acquired substantially corresponding knowledge, in Sweden or abroad, also meets the specific entry requirements.

_Transitional provisions_

A person with credits or qualifications from undergraduate programmes under the previous higher education system corresponding to the entry requirements in the previous paragraph will also be eligible\textsuperscript{21}.

In such cases, the advanced course level as described above shall correspond to a passing grade on courses of at least 60 credits under the previous credit system, including an independent project at the advanced course level/60 credit level, in education.

2.3 Ability in other respects to benefit from the course or study programme

The assessment whether the applicant has such ability in other respects to benefit from the programme shall be made based on prior courses and programmes taken by the applicant, on other previous activities, as well as on the essays and other independent projects of a scholarly nature that have been submitted by the applicant (compare assessment criteria in accordance with the university’s regulations on the selection of doctoral students below).

3 Selection from among the applicants

In selecting between applicants, their ability to benefit from the programme shall be taken into account. The higher education institution determines which assessment criteria shall be used in determining the ability to benefit from the programme. However, the fact that an applicant is considered able to transfer credits from prior courses and study programmes or for professional or vocational experience may not alone give the applicant priority over other applicants\textsuperscript{22}.

Assessment criteria for selection\textsuperscript{23}

The criteria A - B aim at facilitating an examination of the applicant’s ability to benefit from the programme. They should therefore be relevant to the applicant’s

---

\textsuperscript{20} The “advanced course level” refers to the same level of progression as under the previous higher education system. With the new credit system, the advanced course level thus refers to 61-90 credits within the main field of study.

\textsuperscript{21} Point 10, transitional provisions for SFS 2006:1053

\textsuperscript{22} Higher Education Ordinance, Chapter 7, Section 41

\textsuperscript{23} Local regulations on the selection of doctoral students to third-cycle courses and study programmes etc.
ability to later achieve the learning outcomes of the programme. The outcomes are described in annex 1 to this general syllabus.

A Courses, study programmes and other previous activities – formal qualifications

The assessment is based on submitted certificates and transcripts as well as on degree certificates and/or course certificates.

Completed courses and study programmes and experience contributing to the applicant's ability to successfully benefit from the programme applied for are considered an additional qualification.

- Courses and study programmes
  Special emphasis is given to the scope, depth and grades of the applicant’s prior courses and study programmes within the subject area applied for, particularly the grades on written independent projects.
  Emphasis is also given to the scope, depth and grades of prior courses and study programmes within other fields of great relevance to the subject area applied for.

- Other previous activities
  Special emphasis is given to long and independent professional and/or vocational experience of great relevance to the subject area applied for.

B Capability – demonstrated knowledge, competence and skills

The assessment is based on a consideration of the applicant’s submitted essays and other written independent projects of a scholarly nature as well as an outline of research interests. For those applicants who at this stage are considered to be most qualified, and if it is deemed necessary, references will be taken and interviews will be carried out.

It is considered an additional qualification if the applicant demonstrates such knowledge, competence and skills that contribute to them being successfully able to benefit from the programme applied for. These are for example
- sound theoretical, analytic and methodological knowledge;
- sound ability to discuss, in writing and in speech, issues and conclusions;
- intellectual independence; and
- sound ability to carry out advanced tasks within given time frames.

Special emphasis is given to the applicant’s ability to
- identify and formulate realistic and productive research problems;
- integrate knowledge and experience and apply these in ways and in contexts where they have not previously been used; and
- conduct a dialogue characterised by independence as well as by an ability to cooperate.

C Weighing up qualifications

The fact that an applicant is considered able to transfer credits from prior courses and study programmes or for professional or vocational experience may not alone give the applicant priority over other applicants (Higher Education Ordinance, Chapter 7, Section 41).
When weighing up the assessment criteria A and B, the greatest emphasis is placed on criteria B, Capability.

D Gender equality
If, followed from the above, applicants are found to have equal qualifications, preference will be given to applicants of the sex that is underrepresented among the doctoral students within the subject area\textsuperscript{24}. The underrepresented sex here refers to if and when the share of either female or male students enrolled on the subject area’s third-cycle study programme amounts to less than 40 per cent.

\textsuperscript{24} Higher Education Act (SFS 1992:1434), Chapter 1, Section 5, second paragraph and other provisions
