General syllabus for third-cycle courses and study programmes in
SOCIAL WORK
Socialt arbete

This syllabus was approved on 3 May 2007 (reg. no. CF 62-242/2007)\(^1\), \(^2\). It was last amended on 27 November 2017 (reg. no. ORU 5.1-05822/2017).

By virtue of the Higher Education Ordinance, Chapter 6, Section 26 (1993:100), Örebro University prescribes the following.

1 Subject description

Social work is a multi-theoretical social sciences discipline discussing issues surrounding social problems, their origin, and how these are sustained and resolved. Focus is on studying and analysing problematic life situations and conditions for vulnerable groups and individuals; potential solutions to social problems at the individual, group and societal level; as well as the prerequisites for such solutions.

Social work research at Örebro University discusses the significance of social relations. Structural prerequisites for social change efforts for people living under difficult conditions in various phases of life, whether in their professional life or within institutions, are also examined.

2 Outcomes

The intended learning outcomes for the award of the degree, the qualitative targets, are evident from annex 1 to this syllabus. The different components of the third-cycle study programme shall together equip the doctoral student to meet all intended learning outcomes\(^3\). The intended learning outcomes are referred to in more detail in the degree requirements in sections 5 and 6.

---

\(^1\) Faculty Board of Humanities and Social Sciences  
\(^2\) The English translation of this general syllabus was last amended on 20 August 2018.  
\(^3\) Under the new higher education system in Sweden, and in accordance with the terminology recommended by the Swedish Council for Higher Education, courses and study programmes on the doctoral level are referred to as third-cycle courses and study programmes. In this document, the terms doctoral and third-cycle are used interchangeably as prefixes to terms related to studies at the doctoral level and they should therefore be considered synonymous [translator’s comment].
3 Admission to the programme – entry requirements and selection etc.

Provisions on entry requirements and selection can be found in annex 2 to this syllabus. For information on admission in other respects, see the admissions regulations for Örebro University.

4 Programme organisation – general information

There are two types of third-cycle, or doctoral, study programmes – one concluding with the doctoral degree (240 credits, corresponding to four years of full-time study) and one concluding with the licentiate degree (120 credits, corresponding to two years of full-time study).

The programmes mainly consist of courses and the writing of a doctoral or licentiate thesis. The programme components are assessed by means of course examination and the public defence of the thesis respectively. The doctoral student is expected to take an active part in seminars and other auxiliary components during their period of study. The student is further recommended to take advantage of the opportunities offered to attend guest lectures etc. at the university, and to attend and contribute at national and international conferences.

For each doctoral student, a minimum of two supervisors will be appointed, supporting the student during their studies. One of them will be nominated principal supervisor. The detailed organisation of the programme shall be determined in an individual study plan.

In addition to the requirements laid down in this general syllabus, there may be special requirements for the doctoral student’s programme, such as courses that are compulsory within the framework of a research school, which must be specified in the individual study plan. The credit distribution between courses/examinations and thesis should nevertheless be in accordance with the programme organisation as laid down in this general syllabus.

4 Higher Education Ordinance, Chapter 6, Sections 4, 5, 28 and 29 and local guidelines on the organisation of third-cycle courses and study programmes

5 The Higher Education Ordinance stipulation that at least two supervisors be appointed for each doctoral student does not apply to doctoral students who commenced their studies before 1 July 2007. Instead, the older provision of at least one supervisor applies (point 18, transitional provisions of SFS 2006:1053).
5 Degree requirements for the Degree of Doctor, 240 credits

For the Degree of Doctor, the doctoral student must
- have received a passing grade in the examinations\(^6\) of the 60 credits generated by the courses listed below,
- have received a passing grade on a scholarly dissertation (doctoral thesis) corresponding to 180 credits. The thesis is to be defended orally at a public defence event\(^7\).

Which course/courses below a doctoral student shall take is determined based on an assessment of what courses will enable them to meet the intended learning outcomes. The doctoral student plans, in consultation with the supervisor, which courses should be part of their programme. The selection is then laid down in the individual study plan.

Courses, total of 60 credits

A. Courses aiming for a general width and specialisation within the subject area, total of 30 credits

Block I: Philosophy of science and research methods, 15 credits
The courses and examinations included in this block shall refer to outcomes D2, D3, D4 and D10, annex 1.
The courses shall cover both qualitative and quantitative methods and include distinct elements of philosophy of science.

Block II: Social and behavioural science theory relevant to social work, 15 credits
The courses and examinations included in this block shall refer to outcomes D1, D3, D4, D7 and D9, annex 1.
The courses shall cover core areas of social science theory with a particular focus on social relations and social problems within the social work sphere. This means that the courses may discuss social developments at the macro, meso and micro levels.

B. Courses aiming for specific and specialised knowledge within the field selected for the thesis, total of 30 credits

Block III: Courses aiming for specialised knowledge and understanding, 7.5-22.5 credits
The courses and examinations included in this block shall refer to outcomes D1, D4 and D7, annex 1.
The courses included in this block shall cover social theories related to the research field to which the thesis project is intended to contribute.

Block IV: Courses aiming to develop competence and skills, 0-7.5 credits
The courses and examinations included in this block shall, where applicable, refer to outcomes D2, D3 and D4, annex 1.
Any courses within this block shall be selected if required and shall in that case cover such methods and philosophy of science that is particularly essential for the student to successfully complete the research involved in the thesis project.

Block V: Courses aiming for developed capacity in terms of judgement and approach, 0-7.5 credits

\(^6\) Higher Education Ordinance, Chapter 6, Section 32
\(^7\) Higher Education Ordinance, Chapter 6, Sections 5 and 33
The courses and examinations included in this block shall, when applicable, refer to outcomes D9 and D10, annex 1. Any courses within this block shall be selected to meet the need for further competence within fields such as research ethics, philosophy of science and epistemology.

C. About courses on teaching and learning in higher education
Introductory courses on teaching and learning in higher education for doctoral students teaching at the undergraduate and Master’s levels shall not generate credits towards the doctoral programme in social work.

Doctoral thesis and public defence, 180 credits
At the public defence event, the assessment of the doctoral thesis and the public defence thereof shall refer to all intended learning outcomes specified for the award of the doctoral degree, annex 1.

6 Degree requirements for the Degree of Licentiate, 120 credits
The licentiate degree is the degree awarded to those who have been admitted to and successfully completed a licentiate programme. Students who have been admitted to the programme concluding with the doctoral degree have the right to apply for the award of a licentiate degree, as a half-way degree. The degree requirements in this section apply to the licentiate degree both as a final and as a half-way degree.

For the licentiate degree, the doctoral student must
- have received a passing grade in the examinations of the 30 credits generated by the courses listed below,
- have received a passing grade on a scholarly paper (licentiate thesis) corresponding to 90 credits.

Which course/courses below a doctoral student shall take is determined based on an assessment of what courses will enable them to meet the intended learning outcomes. The doctoral student plans, in consultation with the supervisor, which courses should be part of their programme. The selection is then laid down in the individual study plan.

For courses and course blocks that are identical for the licentiate and doctoral degrees, please see outcomes and descriptions in section 5.

Courses, total of 30 credits
A. Courses aiming for a general width and specialisation within the subject area, 22.5 credits

Block I: Philosophy of science and research methods, 15 credits
Block II: Social and behavioural science theory relevant to social work, 7.5 credits

---

8 Örebro University’s local regulations on qualifications
9 Higher Education Ordinance, Chapter 6, Section 32
10 Higher Education Ordinance, Chapter 6, Section 5
11 Since the licentiate degree may constitute a half-way degree on the road to a doctoral degree, the courses intended for a licentiate degree should, in conformity with the courses intended for a doctoral degree, be linked to the outcomes for the doctoral degree, see further in the guidelines for general syllabuses for third-cycle courses and study programmes.
B. Courses aiming for specific and specialised knowledge within the field selected for the thesis, 7.5 credits

Block III: Courses aiming for specialised knowledge and understanding, 0-7.5 credits
Block IV: Courses aiming to develop competence and skills, 0-7.5 credits
Block V: Courses aiming for developed capacity in terms of judgement and approach, 0-7.5 credits

C. About courses on teaching and learning in higher education
Introductory courses on teaching and learning in higher education for doctoral students teaching at the undergraduate and Master’s levels shall not generate credits towards the doctoral programme in social work.

Licentiate thesis, 90 credits
On the examination of the licentiate thesis, the assessment shall refer to all intended learning outcomes specified for the award of the licentiate degree, annex 1.

7 Further information
Further information about provisions for doctoral study programmes can be found on the University website. Documents there include the admissions regulations for Örebro University and other information on national and local regulations.

Entry-into-force and transitional provisions
This general syllabus shall be in effect from 1 July 2007.

Doctoral students who have commenced their studies before 1 July 2007
Doctoral students who have commenced their studies on the programme before 1 July 2007 shall continue their studies according to the new provisions for third-cycle courses and study programmes. As a principal rule, the doctoral students will be awarded their qualification from the new programme. These doctoral students have however the right, should they require, to complete their studies and obtain their qualification pursuant to the earlier provisions for third-cycle courses and study programmes. This right exists until, but no later than, the end of June 2015 (point 5, transitional provisions of SFS 2006:1053).

Amendments to the general syllabus approved by the Vice-Chancellor on 19 October 2010 shall take effect on 1 January 2011. These are a result of amendments to the Higher Education Ordinance, but do not lead to any factual alterations in the general syllabus.

Amendments to the general syllabus approved on 24 April 2014 shall take effect on 1 June 2014. These amendments refer to an adaptation of the general syllabus to the new template, through which, among other things, the different components of

12 Point 1, transitional provisions for SFS 2006:1053
the programme are more clearly linked to the different intended learning outcomes (primarily sections 5 and 6). In connection with this, amendments have also been made to the degree requirements in section 5 and 6.

Doctoral students admitted before 1 April 2013 shall as a rule complete their studies in accordance with the previous degree requirements. If requested by a doctoral student and it is deemed appropriate, provisions may be made in the individual study plan for the student to complete their studies in accordance with the new degree requirements.

---

Amendments to the general syllabus approved on 27 November 2017 shall take effect on 27 November 2017. The amendment refers to the subject description (section 1) and do not involve any alterations in the degree requirements for either the doctoral or licentiate degree.

13 Extract from the Qualifications ordinance, annex 2, Higher Education Ordinance (1993:100)
Admission to research studies – entry requirements

1 Admission requirements – Higher Education Ordinance

The Higher Education Ordinance stipulates that the number of doctoral students that may be admitted by the university may not exceed the number that can be offered supervision and otherwise acceptable conditions for study and whose studies are funded pursuant to the provisions in the Higher Education Ordinance14.

The requirements for admission to third-cycle courses and study programmes are that the applicant
1. meets the general and specific entry requirements that the university may have laid down, and
2. is considered in other respects to have the ability required to benefit from the course or study programme15.

2 Entry requirements

2.1 General entry requirements

A person meets the general entry requirements for third-cycle courses and study programmes if he or she
1. has been awarded a second-cycle qualification,
2. has satisfied the requirements for courses comprising at least 240 credits of which at least 60 credits were awarded in the second-cycle, or
3. has acquired substantially equivalent knowledge in some other way in Sweden or abroad.

The higher education institution may permit an exemption from the general entry requirements for an individual applicant, if there are special grounds16.

Transitional provisions

a) A person with credits or qualifications from undergraduate programmes under the previous higher education system corresponding to the entry requirements above will also be eligible17. Exemptions from the entry requirements may be made also in these cases, if there are special grounds.

b) A person who meets the general entry requirements for research study programmes (120 credits from undergraduate programmes or corresponding knowledge18), before 1 July 2007 will also be considered to meet the general entry requirements for third-cycle courses and study programmes after that, however, until no later than the end of June 201519. Exemptions from this provision are not permitted.

---

14 Higher Education Ordinance, Chapter 7, Section 34
15 Higher Education Ordinance, Chapter 7, Section 35
16 Higher Education Ordinance, Chapter 7, Section 39
17 Point 10, transitional provisions for SFS 2006:1053
18 A person who has completed an undergraduate programme of at least 120 credits, or in some other way, in Sweden or abroad, has acquired substantially corresponding knowledge
19 Point 11, transitional provisions for SFS 2006:1053
2.2 Specific entry requirements

A person meets the specific entry requirements for third-cycle courses and study programmes in the subject if he or she has been awarded a Degree of Bachelor of Science in Social Work of 210 credits, including an independent project at the advanced course level\(^{20}\), or if his or her completed courses and programmes include a passing grade on courses of at least 90 credits, including an independent project at the advanced course level, within a main field of study of significance to the third-cycle programme in social work. A person who has acquired substantially corresponding knowledge, in Sweden or abroad, also meets the specific entry requirements.

_Transitional provisions_

A person with credits or qualifications from undergraduate programmes under the previous higher education system corresponding to the entry requirements in the previous paragraph will also be eligible\(^{21}\).

This primarily refers to the Degree of Bachelor of Science in Social Work of 140 credits, including an independent project on the advanced course level/60 credit level, or passed courses with a theoretical specialisation of at least 60 credits, including an independent projects at the advanced course level/60 credit level, in a subject of relevance to the third-cycle programme in social work.

2.3 Ability in other respects to benefit from the course or study programme

The assessment whether the applicant has such ability in other respects to benefit from the programme shall be made based on prior courses and programmes taken by the applicant, on other previous activities, as well as on the essays and other independent projects of a scholarly nature that have been submitted by the applicant (compare assessment criteria in accordance with the university’s regulations on the selection of doctoral students below).

3 Selection from among the applicants

In selecting between applicants, their ability to benefit from the programme shall be taken into account. The higher education institution determines which assessment criteria shall be used in determining the ability to benefit from the programme.

However, the fact that an applicant is considered able to transfer credits from prior courses and study programmes or for professional or vocational experience may not alone give the applicant priority over other applicants\(^{22}\).

\(^{20}\) The “advanced course level” refers to the same level of progression as under the previous higher education system. With the new credit system, the advanced course level thus refers to 61-90 credits within the main field of study.

\(^{21}\) Point 10, transitional provisions for SFS 2006:1053

\(^{22}\) Higher Education Ordinance, Chapter 7, Section 41
Annex 2 to the general syllabus

Assessment criteria for selection

The criteria A - B aim at facilitating an examination of the applicant’s ability to benefit from the programme. They should therefore be relevant to the applicant’s ability to later achieve the learning outcomes of the programme. The outcomes are described in annex 1 to this general syllabus.

A Courses, study programmes and other previous activities – formal qualifications

The assessment is based on submitted certificates and transcripts as well as on degree certificates and/or course certificates.

Completed courses and study programmes and experience contributing to the applicant’s ability to successfully benefit from the programme applied for are considered an additional qualification.

- Courses and study programmes
  Special emphasis is given to the scope, depth and grades of the applicant’s prior courses and study programmes within the subject area applied for, particularly the grades on written independent projects.
  Emphasis is also given to the scope, depth and grades of prior courses and study programmes within other fields of great relevance to the subject area applied for.

- Other previous activities
  Special emphasis is given to long and independent professional and/or vocational experience of great relevance to the subject area applied for.

B Capability – demonstrated knowledge, competence and skills

The assessment is based on a consideration of the applicant’s submitted essays and other written independent projects of a scholarly nature as well as a project description. For those applicants who at this stage are considered to be most qualified, and if it is deemed necessary, references will be taken and interviews will be carried out.

It is considered an additional qualification if the applicant demonstrates such knowledge, competence and skills that contribute to them being successfully able to benefit from the programme applied for. These are for example

- sound theoretical, analytic and methodological knowledge;
- sound ability to discuss, in writing and in speech, issues and conclusions;
- intellectual independence; and
- sound ability to carry out advanced tasks within given time frames.

Special emphasis is given to the applicant’s ability to

- identify and formulate realistic and productive research problems;
- integrate knowledge and experience and apply these in ways and in contexts where they have not previously been used; and

---

23 Local regulations on the selection of doctoral students to third-cycle courses and study programmes etc.
24 The project description should contain information on topic and aim, research questions and disposition, research interest, theory and methods, as well as material. It should be around 5-10 pages long.

(Social Work)
- conduct a dialogue characterised by independence as well as by an ability to cooperate.

C Weighing up qualifications

The fact that an applicant is considered able to transfer credits from prior courses and study programmes or for professional or vocational experience may not alone give the applicant priority over other applicants (Higher Education Ordinance, Chapter 7, Section 41).

When weighing up the assessment criteria A and B, the greatest emphasis is placed on criteria B, Capability.

D Gender equality

If, followed from the above, applicants are found to have equal qualifications, preference will be given to applicants of the sex that is underrepresented among the doctoral students within the subject area. The underrepresented sex here refers to if and when the share of either female or male students enrolled on the subject area’s third-cycle study programme amounts to less than 40 per cent.

25 Higher Education Act (SFS 1992:1434), Chapter 1, Section 5, second paragraph and other provisions (Social Work)
