## Assessment at the mid-way review in medical science

The mid-way review functions as a quality review and is intended to provide support for the doctoral student during the second half of the doctoral programme. The mid-way review is not an examination. The assessment considers the completed as well as the planned thesis work in relation to the intended learning outcomes for the doctoral degree, focusing on future studies.

The seminar opens with the doctoral student presenting the completed and planned work on their thesis. This is followed by a discussion, primarily with the experts, then also with the audience as a whole. The seminar is concluded after a private conversation between the doctoral students and the experts. The chair of the seminar is responsible for making sure that the assessment form is completed and submitted to the research study administrator. Note that all fields in the assessment form are required and shall be filled out.

Comments/opinions given by the experts shall be considered in the continued thesis work. This assessment form shall be attached and considered in the proposal for and decision on the public defence of the thesis.

### Mid-way review

Date
Doctoral student
Date of birth, or if applicable, your Swedish personal identity number
Subject area and specialisation
Principal supervisor
Assistant supervisor(s)
Chair

### Experts

Expert; name and university
Expert; name and university
Expert; name and university

## Assessment

Activity, progress and quality of research project. Comments and possible recommendations:
Development of the student's learning in relation to the intended learning outcomes for the doctoral degree. Comments and possible recommendations:
Student's development towards becoming an independent researcher. Comments and possible recommendations:
Supervision from principal supervisor and assistant supervisor. Comments and possible recommendations:
Do the existing ethical permissions cover the planned and completed projects? Comments and possible recommendations:
Courses at the doctoral level and knowledge requirements. Comments and possible recommendations:
Overall performance of the student's mid-way review. Comments and possible recommendations:

## Experts' overall assessment

- In relation to the intended learning outcomes for the doctoral degree, our assessment is that this work has the necessary qualities to lead to a doctoral degree.
- In relation to the intended learning outcomes for the doctoral degree, our assessment is that this work has shortcomings and requires extensive alterations as detailed above. In this case, the principal supervisor shall contact the specialisation coordinator.

## Signature

By signing this document, it is hereby confirmed that the above assessment and advice have been read and approved by all experts.

### The chair of the mid-way review shall send the form to:

For Medical Science with a specialisation in Healthcare Sciences

- Email address: [fouadm.hv@oru.se](mailto:fouadm.hv@oru.se)
- Mailing address: Örebro University, School of Health Sciences, Study and research administration, SE-701 82 Örebro

For Medical Science with a specialisation in Biomedicine, Medicine and Surgical Sciences

- Email address: [fouadm.mv@oru.se](mailto:fouadm.mv@oru.se)
- Mailing address: Örebro University, School of Medical Sciences, Study and research administration, Campus USÖ, SE-701 82 Örebro)

The research study administrator will send a copy to the doctoral student, the principal supervisor, the Head of School, the specialisation coordinator and the Director of Studies.
