

PubMed
and **EndNote:**
import references and
handle pdfs

(170330)

Örebro universitetsbibliotek
Medicinska biblioteket

medbibl@oru.se

Go to PubMed:

Open **clipboard**, where you have collected your references and click on **Send to**

There are two ways to export references to EndNote –
Sent to: Citation manager or Send to: File

If you choose *Citation manager* and *Create File* your references will be imported directly without a duplicate control.

To avoid the direct import choose *Send to: File* instead

Change the format to **MEDLINE** and click on **Create File**

Choose Save As

Save the file pubmed_result.txt on your desktop. Next time, you save the file with the same name. That way you avoid getting a number of files of pubmed_result.txt

Import to EndNote

Go to EndNote

Click on the **Import** arrow

or go to **File** and **Import**
use the Import Option PubMed(NLM)

Import file: click on **Choose File** – find the file (pubmed_result.txt)

Import option: choose **PubMed(NLM)**

Duplicates – choose **Discard Duplicates**

Click on **Import**

The Import Option is set as EndNote library when you first enter EndNote

The most usual reason for failure with the import is that the Import Option is EndNote Library.

EndNote will try to find the pdfs automatically. But sometimes EndNote fails to find them, despite the fact that they are available. If that is the case, you have to search for them "manually"

If you have saved pdfs on your computer, you can attach them to EndNote. You can also attach pdfs that EndNote has failed to find.

Review

Controversies in bariatric surgery

P. E. O'Brien

Results and obesity surge measures and procedures, 1 outcome stud with 72 per c

banding (LAGB) are equally effective, with 54 per cent EWL. There are no long-term data on vertical sleeve gastrectomy. Type II diabetes is a common and serious disease, usually associated with increased weight. Multiple RCTs have shown that bariatric surgery provides clear benefits over continuing with
